

# ROBMASK

R28

VERSION: 190503  
Page:1/1

## HALF-MASK FFP2 AND FFP3

### DEFINITION

Self filtering mask that protects against particles.

- 68534 Robmask FFP2: protection against particles.
- 68535 Robmask FFP3: maximum protection against particles.

### CHARACTERISTICS

- Anatomical: adapt to any face.
- Great comfort for breathing
- They offer an excellent visual field and are compatible with eye protection.
- Nasal clip located between two internal layers to avoid direct contact with the skin, oxidation and accumulation of dirt.
- Facial seal: made of soft foam and a technical fabric providing excellent compression and deformation. The textile layer is very soft and pleasant to the touch, absorbs sweat and keeps the skin fresh and dry.
  - Partial easy seal for Robmask FFP2
  - Total easy seal for Robmask FFP3
