· Additional information: For the wording of the listed hazard phrases refer to section 16.

SECTION 4: First aid measures

· 4.1 Description of first aid measures

· General information:

Symptoms of poisoning may even occur after several hours; therefore medical observation for at least 48 hours after the accident.

Personal protection for the First Aider.

Take affected persons out of danger area and lay down.

In case of irregular breathing or respiratory arrest provide artificial respiration.

Immediately remove any clothing soiled by the product.

• After inhalation:

Remove person to fresh air and keep comfortable for breathing. Supply fresh air or oxygen; call for doctor.

In case of unconsciousness place patient stably in side position for transportation.

• After skin contact:

Immediately wash with water and soap and rinse thoroughly.

If skin irritation continues, consult a doctor.

- After eye contact: Rinse opened eye for several minutes under running water. Then consult a doctor.
- · After swallowing: Do not induce vomiting; call for medical help immediately.
- 4.2 Most important symptoms and effects, both acute and delayed No further relevant information available.
- · 4.3 Indication of any immediate medical attention and special treatment needed
- No further relevant information available.

SECTION 5: Firefighting measures

- · 5.1 Extinguishing media
- · Suitable extinguishing agents:

CO2, powder or water spray. Fight larger fires with water spray or alcohol resistant foam.

- · 5.2 Special hazards arising from the substance or mixture
- Formation of toxic gases is possible during heating or in case of fire.

In case of fire, the product promotes combustion.

May decompose explosively in absence of fire due to formation of vapour-air-mixture.

- · 5.3 Advice for firefighters
- · Protective equipment:
- Wear self-contained respiratory protective device.
- Do not inhale explosion gases or combustion gases.
- Additional information

Remove undamaged containers from the danger zone.

Cool endangered receptacles with water spray.

Collect contaminated fire fighting water separately. It must not enter the sewage system.

(Contd. on page 4)

V - 2

Revision: 11.01.2017

Trade name: BPO-Paste rot

(Contd. of page 3) Dispose of fire debris and contaminated fire fighting water in accordance with official regulations.

SECTION 6: Accidental release measures

· 6.1 Personal precautions, protective equipment and emergency procedures Wear protective equipment. Keep unprotected persons away. *Ensure adequate ventilation* Use suitable respiratory protective device in case of insufficient ventilation. Avoid contact with the eyes and skin. Keep away from ignition sources. Pls. refer to section 10 · 6.2 Environmental precautions: Inform respective authorities in case of seepage into water course or sewage system. Do not allow to enter sewers/ surface or ground water. • 6.3 Methods and material for containment and cleaning up: Collect with an inert, non-combustible, absorbent material (i.e. sand, diatomaceous earth, acid binder, universal binder). Do not seal receptacle gas tight. Pls. refer to section 10 · 6.4 Reference to other sections See Section 7 for information on safe handling. See Section 8 for information on personal protection equipment. See Section 13 for disposal information.

SECTION 7: Handling and storage

· 7.1 Precautions for safe handling

Keep receptacles tightly sealed.

Open and handle receptacle with care.

Do not return unused material to original containers – decomposition hazard!

Restrict the quantity stored at the work place.

Resistant to inert materials only.

Suitable materials: Stainless steel (DIN 1.4571), PVC, polyethylene, glass-lined apparatus.

Keep apart from dirt, rust, chemicals, especially reducing substances, acids, alkaline solutions, amines and heavy metal compounds 8such as accelerator, dessicative, metal soaps). Avoid naked flames, sparks, other ignition sources and sunlight.

Do not mix with accelerators or reducing agents.

Weigh out and mix separately when processing polyester resins.

Avoid storage in containers with an airtight closure to prevent hazardous pressure build-up due to an eventual decomposition.

Avoid contact with the eyes and skin.

Ensure good ventilation/exhaustion at the workplace.

Do not inhale gases / fumes / aerosols.

Adhere to the workplace limit values and / or other threshold values.

Avoid release to the environment.

· Information about fire - and explosion protection:

Protect from heat.

Protect from sunlight.

Keep ignition sources away - Do not smoke.

Prevent impact and friction.

Thermal decomposition with temperatures above 50 $^\circ C$ under formation of explosive vapours/gases

Avoid naked flames, sparks, other ignition sources and sunlight.

Protect against electrostatic charges.

Anti-explosion protection required

Fumes can combine with air to form an explosive mixture.

Fire propagating effect due to oxygen release.

Keep apart from incompatible substances, dirt and high temperatures.

|---|--------------------|
| Pls. refer to section 10 | |
| · 7.2 Conditions for safe storage, including any incompatibilities | |
| · Storage: | |
| · Requirements to be met by storerooms and receptacles: | |
| Store in a cool location. | |
| Store only in the original receptacle. | |
| Prevent any seepage into the ground. | |
| Adhere to the provisions of the Law on Water Protection. | |
| Use only receptacles specifically permitted for this substance/product. | |
| · Information about storage in one common storage facility: | |
| Keep apart from other chemicals, in particular from accelerators. | |
| Store away from foodstuffs. | |
| · Further information about storage conditions: | |
| Store in cool, dry conditions in well sealed receptacles. | |
| Protect from heat and direct sunlight. | |
| Protect from contamination. | |
| Store under lock and key and out of the reach of children. | |
| \cdot Maximum storage temperature: +25 °C | |
| • 7.3 Specific end use(s) No further relevant information available. | |

SECTION 8: Exposure controls/personal protection

(Contd. of page 6)

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

· Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

Neoprene gloves

Nitrile rubber, NBR

Recommended thickness of the material: $\geq 0.14 \text{ mm}$

 \cdot Penetration time of glove material

The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.

For the mixture of chemicals mentioned below the penetration time has to be at least 30 minutes (Permeation according to EN 374 Part 3: Level 2).

• Eye protection:

Tightly sealed goggles

· Body protection: Protective work clothing

SECTION 9: Physical and chemical properties

· 9.1 Information on basic physical and chemical properties

| · General Information | |
|------------------------------------|--|
| · Appearance: | |
| Form: | Pasty |
| Colour: | According to product specification |
| · Odour: | Characteristic |
| · Change in condition | |
| Melting point/Melting range: | Undetermined. |
| Boiling point/Boiling range: | Undetermined. |
| · Flash point: | > 50 °C |
| · Ignition temperature: | Not applicable |
| · Decomposition temperature: | $50 \ ^{\circ}C \ (SADT)$ |
| · Self-igniting: | Pls. refer to section 10 |
| • Danger of explosion: | Pls. refer to section 10 |
| • Density at 20 •C: | $\sim 1.1-1.2 \ g/cm^3$ |
| · Solubility in / Miscibility with | |
| water: | Not miscible or difficult to mix. |
| • 9.2 Other information | No further relevant information available. |

SECTION 10: Stability and reactivity

· 10.1 Reactivity No decomposition if used and stored according to specifications.

• 10.2 Chemical stability Resistant to inert materials only. Suitable materials: Stainless steel (DIN 1.4571), PVC, polyethylene, glass-lined apparatus.

A. Förs

Thermal decomposition or direct contact with numerous additives, such as reducing agents (i.e. amine accelerator), heavy metal compounds (in particular cobalt accelerators), acids and alkaline solutions, may lead to hazardous, autoaccelerating decomposition reactions, and possibly, to explosion or fire.

10.4 Conditions to avoid Avoid naked flames, sparks, other ignition sources and sunlight. Protect from heat.
>25 °C To avoid thermal decomposition do not overheat.

Thermal decomposition with temperatures above 50 °C (SADT)

· 10.5 Incompatible materials:

Keep apart from dirt, rust, chemicals, especially reducing substances, acids, alkaline solutions, amines and heavy metal compounds 8such as accelerator, dessicative, metal soaps) Avoid any direct contact with accelerators.

• 10.6 Hazardous decomposition products:

Formation of various organic degradation products and inflammable and explosive vapours/gases upon decomposition.

Danger of forming toxic pyrolysis products.

SECTION 11: Toxicological information

· 11.1 Information on toxicological effects

• Acute toxicity Based on available data, the classification criteria are not met.

| · LD/LC50 values relevant for classification: | | | | |

| · 14.6 Special precautions for user · EMS Number: | Warning: Organic peroxides. F-J,S-R | |
| · 14.7 Transport in bulk according to Anne Marpol and the IBC Code | ex II of Not applicable. | |
| · Transport/Additional information: | | |
| · ADR | | |
| \cdot Limited quantities (LQ) | 500 g | |
| · Transport category | 2 | |
| • Tunnel restriction code | D | |

SECTION 15: Regulatory information

· 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

· Directive 2012/18/EU

· Named dangerous substances - ANNEX I None of the ingredients is listed.

· Seveso category

P6b SELF-REACTIVE SUBSTANCES AND MIXTURES and ORGANIC PEROXIDES E1 Hazardous to the Aquatic Environment

· National regulations:

· Information about limitation of use:

Employment restrictions concerning juveniles must be observed. Employment restrictions concerning pregnant and lactating women must be observed.

· 15.2 Chemical safety assessment: A Chemical Safety Assessment has not been carried out.

SECTION 16: Other information

This information is based on our present knowledge. However, this shall not constitute a guarantee for any specific product features and shall not establish a legally valid contractual relationship.
